

Green areas are controlled with the Academy File Manager app. This app includes image storage and an HTML editor. The yellow holiday-banner.jpg file is pulled from a directory on the ScanSolutions.com domain and loaded automatically. Controls allows copy and paste from other programs and sources to get started. Then, you can customize the content with a full array of tools. Also these tools allows direct access to the source code for making fine adjustments. Added new File Manager app that will allow easily editing of html files and image management with-in Utils.

WARNING: In PHP code, everything is case sensitive. So, graphic.png and Graphic.png are two different files.
